The group continue to give their time and enthusiasm to this project. They are involved in a number of projects, and most recently have planted bulbs, both in the garden area and in planters. There are plans to put a bench in the Creation Care garden at the north east side of the church, and to place some slates with bible quotations around the garden. They have also been working on a path through the garden, and a hedge of native plant species being planted along the boundary with our neighbours. Furthermore, the east boundary of the church grounds has now been pruned and tidied.

**31.03.2022**

Another recent working party involved the construction of a willow edged bark path and the start of the construction of a bug hotel. The trees have been cut back and the area looks much smarter with more light able to get through. Our near neighbours have been appreciative of this work. [An article on the latest achievements of the Creation Care team is included in the most recent edition of Cornerstone.](#) A really positive outcome of this initiative has been the relationships that have been formed between members of the congregation that didn't previously know each other very well or at all!
